The screenshot shows the Lee Precision website in a Mozilla Firefox browser window. The page title is "Lee Carbide Factory Crimp Die - Lee Precision". The URL in the address bar is "leeprecision.com/reloading-dies/hand-gun-dies/lee-carbide-factory-crimp-die". The website features a red header with the "LEE" logo and navigation links: Home, Login, Register, Contact Us, Quick Order, Paper Catalog, and Shopping Cart. A search bar is also present. The main content area is titled "Lee Carbide Factory Crimp Die" and includes a detailed description of the die's function, a technical diagram of the die and a cartridge, and a list of supported calibers. The left sidebar contains a "CATEGORIES" menu with options like "2014 New Products", "50 BMG", "Reloading Dies", and "Hand Gun Dies".

**Lee Carbide Factory Crimp Die**

A carbide sizer inside the Carbide Factory Crimp die post-sizes the cartridge while it is crimped so every round will positively chamber freely with factory like dependability. The adjusting screw quickly and easily sets the desired amount of crimp. It is impossible to buckle the case as with a conventional bullet seating die. Trim length is not critical so this extra operation takes less time than it would if cases were trimmed and chamfered.

Revolver dies roll crimp with no limit as to the amount. A perfect taper crimp is applied to auto-loader rounds. The crimper cannot be misadjusted to make a case mouth too small to properly head-space. A firm crimp is essential for dependable and accurate ammunition. It eliminates the problems of poor ignition of slow burning magnum powders.

### Reloader Press

An outstanding value. Exclusive balance lever that can't drop down to pinch your fingers. Unlimited hand clearance that only a "C" frame can offer. Works equally well with the right or left hand. Even if you already own a press, an extra press is always useful for decapping, bullet seating or bullet sizing. Accepts standard 7/8 x14 thread dies and standard [universal press shell holders](#).
