

STI International, Inc.

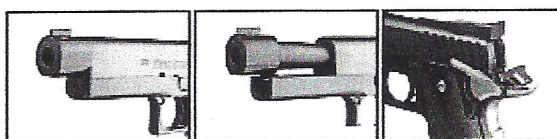

The Continuing Evolution of the 1911

THE TruSight

Limited? You bet

The TruSight merges technology and physics to help you gain the advantage at the next match. Using a 4.15 slide the TruSight has a faster cycle rate than a traditional 5" pistol. The TruSight barrel system has the sight dovetailed to the barrel rather than the slide for quicker front sight pick up. The TruSight barrel incorporates an expansion chamber that does not add any weight to the pistol. In fact, the TruSight weighs less than pistols comparable to it in its class.
